How to use Alexa for your Air Conditioner?

There are two ways you can operate your Air Conditioner using Alexa:

1. First way is to, open the communication session with Alexa by saying: **“Alexa, open airCloud”**.

If you have given specific name called “living room” to your Air Conditioner in your airCloud Home App. Then say,

“Turn ON living room”

“Switch ON living room”

“Turn ON living room in cool mode”

2. Second way is first to use phrase **“Alexa, ask/open airCloud to”** and give specific commands like, If you have given specific name called “living room” to your Air Conditioner in your airCloud Home App. Then say,

“Alexa, ask/open airCloud to Turn ON living room”

“Alexa, ask/open airCloud to Switch ON living room”

“Alexa, ask/open airCloud to Turn ON living room in cool mode”

Note:

- For more information on how to operate Alexa please visit [Help](#).

4. Follow the on-screen instructions and login airCloud Home App Account. Please ensure that you use your email address and password that you login airCloud Home App with.

The screenshot shows a mobile application interface for signing in. At the top, the status bar displays "No SIM", signal strength, Wi-Fi, and battery at 75% with the time 1:09. Below the status bar is a dark header with a close button (X), a lock icon, the text "Please sign in", and the URL "oauth2-global-prod.aircloudhome.com". The main content area has a light gray background and features the heading "Please sign in" in bold black text. Below the heading are two white input fields: "Username" and "Password". A prominent blue button with the text "Sign in" is positioned below the password field. At the bottom of the screen, the standard Android navigation bar is visible with back, home, and recent apps icons.
